## **SECTION B: Event report and reflection**

### **1. Event objectives-**

Teaching Learning Centre, Sharda University, in its endeavour to increase and improve faculty standards across all levels, especially in the area of teaching learning practices, is conducting a Faculty Development Programme (FDP) on "Education 5.0: Constructive Alignment in Teaching Learning Practices" from 19th - 26th December 2023. The pace of change in education has accelerated in recent years, with emerging trends in teaching learning practices, there are new challenges and opportunities for academicians. This faculty development programme is to equip the faculty members with the latest insight with what is expected from the learner point of view and inform them with the latest technologies associated with Education 5.0. **Highly renowned professionals from academia and industry were invited to enlighten the participants on various areas.**

### **2. Event description:**

Education 5.0 is the latest evolution in the way we look at learning. The core idea behind Education 5.0 is to make the learning experience that is based on individual student needs, abilities and learning abilities. It demonstrates and emphasizes the use of technologies to analyze student data and performance and further use it for adaptive teaching methods that work best for each student. This enables a level of customized education that is not prevalent with the previous systems.

Hence, Education 5.0 is a concept that refers to the next generation of education- that is personalized, learner-centric and technology based to enhance the learning experience of the student. The core idea is to provide flexible, adaptable, and responsive education as per the needs of individual learners.

Education 5.0 is transforming the present education system to more action-based, learner-centric and outcome-based systems. The education sector has to change based on the changing requirements of the industry, business organization and the society. Innovation and creativity are required for better sustainability. Bringing changes proactively in every aspect of the teaching learning processes and pedagogy is much needed for an hour.

### **Expected Outcomes of the FDP**

1. To make teaching more learner-centric.
2. To define the intended learning outcomes for our students.
3. Design of effective curriculum
4. Assessment tools and techniques to align to the intended outcomes.
5. Use of technologies for Education 5.0
6. Promote collaboration among faculty members and between different departments in the institution.
7. Foster a culture of continuous learning and development among faculty members.

# EDUCATION 5.0: CONSTRUCTIVE ALIGNMENT in TEACHING LEARNING PRACTICES

19<sup>th</sup> - 26<sup>th</sup> December 2023

## ABOUT THE PROGRAMME

Teaching Learning Centre, Sharda University, in its endeavour to increase and improve faculty standards across all levels, especially in the area of teaching learning practices, is conducting a Faculty Development Programme (FDP) on "Education 5.0: Constructive Alignment in Teaching Learning Practices" from 19th – 26th December 2023. The pace of change in education has accelerated in recent years, with emerging trends in teaching learning practices, there are new challenges and opportunities for academicians. This faculty development programme is to equip the faculty members with the latest insight with what is expected from the learner point of view and inform them with the latest technologies associated with Education 5.0. Highly renowned professionals from academia and industry have been invited to enlighten the participants on various areas.

## AIMS AND OBJECTIVES

Education 5.0 is the latest evolution in the way we look at learning. The core idea behind Education 5.0 is to make the learning experience that is based on individual student needs, abilities and learning abilities. It demonstrates and emphasizes the use of technologies to analyze student data and performance and further use it for adaptive teaching methods that work best for each student. This enables a level of customized education that is not prevalent with the previous systems.

Hence, Education 5.0 is a concept that refers to the next generation of education- that is personalized, learner-centric and technology based to enhance the learning experience of the student. The core idea is to provide flexible, adaptable, and responsive education as per the needs of individual learners.

Education 5.0 is transforming the present education system to more action-based, learner-centric and outcome-based systems. The education sector has to change based on the changing requirements of the industry, business organization and the society. Innovation and creativity are required for better sustainability. Bringing changes proactively in every aspect of the teaching learning processes and pedagogy is much needed for an hour.

## Expected Outcomes of the FDP

1. To make teaching more learner-centric.
2. To define the intended learning outcomes for our students.
3. Design of effective curriculum
4. Assessment tools and techniques to align to the intended outcomes.
5. Use of technologies for Education 5.0
6. Promote collaboration among faculty members and between different departments in the institution.
7. Foster a culture of continuous learning and development among faculty members.

## **ABOUT SHARDA UNIVERSITY**

The Sharda Group of Institutions has been a provider of world-class education since 1996. Sharda University envisions to serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship. It has 13,000+ students from 95+ countries, 29 states, and Union Territories, providing cultural diversity and global exposure to students. It has 23000+ alumni who are today leaders in their realms. Sharda University is NAAC A+ University with Overall NIRF Rank of 87. Teaching Learning Center at Sharda University is to equip the faculty members with the expertise, skills and knowledge they need for capacity building of students. Teaching as a profession requires highly specialized skills and knowledge to impact significantly on student learning and therefore teachers must refine their conceptual and pedagogical skills.
