

The Teaching Learning Centre
is organizing
TWO Sessions
on
2nd March, 2024

Session 1:
**Objectives, Rubrics & Expected
Outcomes on Project
Based Learning
& Research Based Learning**

Speaker :
Prof (Dr.) Rashmi Priyadarshini
Associate Dean, LMS
11:00 am - 12:00 pm

Session 2:
**Technology Readiness
Level and Its Importance**

Speaker :
Prof (Dr.) Bhuvnesh Kumar
Dean Research
12:00 pm - 01:00 pm

It is mandatory to register for the event

SECTION B: Event report and reflection

Event objectives-

- To understand and formulate objectives and rubrics of PBL and RBL.
- To understand and formulate expected outcomes of PBL and RBL.
- To understand Technology Readiness Level (TRL), that is a scale used to assess the maturity of a particular
- technology.
- To understand the scales of TRL that typically ranges from TRL 1 (conceptual stage) to TRL 9 (fully matured and
- proven in operational conditions).
- Knowledge of TRL to categorise the projects as Science & Technology (S & T), Technology Demonstrator (TD)
- and Mission Mode (MM).
- Role of TRL in shaping research and development efforts for product development, investment decisions, and technology deployment strategies.

1. Event description:

In this session, the key objectives have been discussed for creating effective rubrics-based assessment and outlining the expected outcomes associated with implementing PBL and RBL methodologies.

Whether an educator looking to enhance our teaching strategies or a student eager to delve deeper into experiential learning approaches, this session will provide valuable insights and practical guidance. Learn how to effectively structure projects, develop meaningful research inquiries, and assess learning outcomes in alignment with educational objectives.

Technology Readiness Level (TRL) and its significance in various fields. In this session, experts delve into the definition of TRL and explore its role in assessing the maturity of technologies, ranging from early-stage research to full-scale deployment. The speaker has discussed the various TRL levels and how they correspond to different stages of technological development, from basic principles to real-world applications.

Furthermore, it has been examined why TRL is crucial for decision-making processes in industries such as aerospace, healthcare, and information technology. Discover how organizations use TRL assessments to gauge risks, prioritize investments, and accelerate the adoption of emerging technologies.
